

Cranes, Hoists, Parts, Installation, Support, 24-Hour Emergency Service

Precision Welding & Fabrication, Inc. is very pleased with the quality of our two recently-purchased three ton overhead bridge cranes. The electrician that did the electrical connection to the cranes said that the electrical components are of very good quality. We had a couple of questions during the purchasing phase as well as during the assembly. These were answered very promptly by your service staff. If we have need of any more cranes, we would certainly do business with Hoosier Crane again.

We have purchased several crane kits from Hoosier Crane and have always received very good service from the company. I especially appreciate the rapid, complete quotes and the engineering assistance.

My son and I purchased a small two ton crane kit from Hoosier Crane. We had no experience at this type of installation — we are welder/fabricators. The unit was on time, compact, easy-to-install, and works great. We only had two questions during installation and the 24-hour service group answered both of them in minutes... at 11:00 at night. Great service, great crane, happy customers.

The **HOOSIER CRANE** staff doesn't take the simple path. We have the depth of experience to go beyond your initial question or problem to truly understand the whole situation that you're facing and propose appropriate solutions. We don't sit around, wait for the phone to ring, and take orders. The **HOOSIER CRANE** service team goes to our customers' job sites on a consistent basis and helps them make appropriate decisions on their products and services.

HOOSIER CRANE customers have access to on-site, online, and telephone help immediately whether it is an emergency crane repair, product order or a technical question. **HOOSIER CRANE** responds to emergencies 24/7 to get you back up as soon as possible. We make sure that you are 100% satisfied. We employ Hoosier values: Honesty, old-fashioned work ethic, and person-to-person attention.
