# HOIST REPAIR

## WE REPAIR YOUR HOISTS IN HOUSE

We offer local hoist pick up from your location and we bring it back to our shop to be repaired by our certified service technicians. This means you don't have to pay for expensive freight.

## SUPER FAST TURN AROUND

Time is money, and we understand you need your hoists to efficiently run your business. Our hoist repair technicians are trained to deliver a fully repaired hoist back to you faster than anyone else.

## DON'T WORRY ABOUT A THING

Your workers have their own things to do, repairing a hoist shouldn't be one of them. That's Hoosier Crane's job. Our hoist repair saves your maintenance staff the time and complication of repairing the hoist yourself.

# HOIST REPAIR

## WARRANTY SERVICE CENTER

No matter where you bought your hoist, if it is under the manufacturer's warranty we can fix it.

Hoosier Crane is an authorized warranty service center for the following brands:

**SHAW-BOX**

## FACTORY TRAINED SERVICE TECHNICIANS

Our service technicians receive extensive on going certification and training by the Manufacturer who built your hoist. That means sending our techs to CMCO school in New York or bringing in engineers from Street Crane in England. It is not the easy way, but the result is a hoist technician that has the knowledge to fix your hoist right the first time.

## ALL HOISTS SUPPORTED

Hoosier Crane supports all makes and models of hoists regardless of where you purchased it. Our hoist repair shop is equipped to service single phase 110/220 and three phase 208, 230, 460 and 480 volt power. We are also experienced in servicing manual and air hoists.

## LARGEST STOCK OF HOIST REPAIR PARTS

Hoosier Crane is a Master Parts Depot for many hoist brands. We stock the largest selection of hoist repair parts in the region with well over half a million dollars of parts on hand. Plus we buy in bulk to save you even more, whether it is barrels of chain or full spools of pendant cable we buy smart to keep costs down.

## LOAD TESTING HOISTS

Every hoist that passes through our hoist shop receives a multi-point inspection to check for common wear items and other problems. After your hoist is repaired we load test all hoists up to 3 tons to ensure that it can safely lift the rated load. We have the ability to load test larger hoists with special arrangements.
