

Seven REASONS to buy a crane from Hoosier Crane

1 We're certified, trained and experienced crane fabricators. We build cranes with up to 100 ft. spans and capacities from 1/4 ton to 80 ton. Our fabricators are always busy and with good reason—we value our reputation as an honest, hard-working company that delivers on its commitments.

2 **Professional installation capabilities.** If you don't have the time and resources to install your crane, we can get it done for you. Hoosier Crane has a first-class installation crew that pays attention to detail. Our team is going to install your system safely, professionally and in a timely manner. Hoosier Crane's installation supervisor will stay in constant contact with your project manager and keep an open line of communication to help eliminate delays. Below are some of the items we bring to the job site:

- Scissor lifts, trailers, forklifts, cranes
- Laser level equipment for accurate layout and alignment
- Safety equipment including harnesses, lockout/tagout equipment, hard hats, and safety glasses
- Documentation including progress reports and job details

3 **FREE phone and email support from our engineering staff.** We're here to answer all of your engineering questions and concerns prior, during and at the completion of the crane project. Our engineering staff members have built many cranes and they have the experience and know-how to help you get your crane up and running.

4

Optional equipment at best pricing. We carry:

- Remote radio control systems
- Below-the-hook lifting devices including vacuum lifters, spreader beams, magnets, chain slings, nylon slings
- and much, much more

5

Save up to 50% on a Spare Parts Package. Order a spare parts package when you order your crane and save up to 50% on the parts. Plus, you'll appreciate the convenience of having the parts in your inventory when you need them. Call us for a quote at 1-800-509-6131 or 574-523-2945.

Authorized Dealer

6

Outstanding service. Our factory-trained and experienced service crew can provide hands-on operator training and a start-up inspection with documentation. Hoosier Crane will make sure that you are 100% satisfied with the start-up and operation of your crane system.

7

Satisfied customers. These are comments from a couple of our crane customers.

"We were in need of a crane in a new facility we set up in Elkhart. We shopped around, looking at new and used cranes that would be applicable to our requirements. The staff at Hoosier Crane won the bid process, providing support and assistance from the initial request for quote, through installation, and final training of our personnel. They answered every question promptly and professionally, bridging the gap between civil engineers and our engineering staff. They are a reputable company that can be trusted."

—Elmer Ford

Cooling Unit Plant Manager
Dometic USA

"Elite Stone Importers had a unique, multi-crane need for our new facility in Tinton Falls, New Jersey. After contacting several crane companies, we were fortunate to come across Hoosier Crane. After speaking to the account rep, Todd Cook, he promptly made arrangements for a site visit to our New Jersey facility. With strong knowledge and good insight to our needs, I was presented with a competitive bid for a job that was ultimately completed by a class act organization. The installers were professional, friendly, accommodating and knowledgeable. The job was completed ahead of schedule and to our satisfaction. After the cranes were installed, Hoosier Crane is still there by my side ensuring that our special requests for machine products are being met which are out of the initial scope of work. Hoosier Crane is a worthy national crane supplier / installer."

—Mike Johnson

President and CEO
Elite Stone Importers

THANK YOU

for the opportunity to quote on your crane project

We look forward to working with you — The Hoosier Crane staff
